## AutoCAD

Connect your phone to the computer and launch Autodesk Autocad. Autocad will automatically detect your phone and ask you to activate it. After the activation is finished you will have access to all the mobile features of Autocad. Eighteen months ago, we talked about a game that wasn't happening. Now it's a game that may never be made. It was initially thought the game called Soluza was heading to the Xbox One and Wii U. Now, however, it's unclear where the game will end up as there are no official announcements of any kind from either developer or publisher. A teaser was once again shared on the official Japanese website for the game (via Japanator), however, we're not sure if that was an error or not: Here's a look at the trailer: This content is hosted on an external platform, which will only display it if you accept targeting cookies. Please enable cookies to view. Manage cookie settings The official website for Soluza is still up, however, and seems to have a few more details. Here's the teaser: This content is hosted on an external platform, which will only display it if you accept targeting cookies. Please enable cookies to view. Manage cookie settings The main Soluza website is updated to reveal the release date is October 23, 2015: This content is hosted on an external platform, which will only display it if you accept targeting cookies. Please enable cookies to view. Manage cookie settings Sadly, the game is also called Soluza, rather than Soluza: Cloud, as we hoped. Hopefully it's a marketing miss. Eurogamer has contacted Square Enix for clarification. Q: Does the TFS 2010 build agent have the rights to the TFS server? Does the TFS 2010 build agent have the rights to the TFS server? I have a build that fails with the error TF30063: The user name or password is incorrect for user . This is because the agent does not have the necessary permissions to the server in question. A: You will have to set up a group for all your users and then map your account to that group in Windows. Q: SQLAlchemy: Automatically update records on a table I have a database with a table that updates itself every few hours or so

## What's New in the AutoCAD?

Markup Assist: Automatically create tasks and help documents for you to provide designs to your stakeholders. (video: 1:34 min.) Markup Assist: Automatically creates tasks and help documents for you to send to your stakeholders. (video: 1:34 min.) Markup Assist: Automatically generates a textual markup for you to send to your stakeholders. (video: 1:45 min.) Markup Assist: Automatically generates a textual markup for you to send to your stakeholders. (video: 1:45 min.) Floorplan Assistant: Automatically finds the best room size and uses a simulation to give you a quick overview of what your design will look like. (video: 0:49 min.) Drawing Records Manager: Compare the past and current drawings side by side for accuracy. You can also give your design team or customers a unique link to the current drawing, or share the link with your design team to make changes to the current drawing. (video: 1:21 min.) ## **System Requirements:**

All game modes will be active at launch for all platforms. All platforms (PC, Xbox One, and PS4) will support 4K resolution at 30 frames per second. PS3 and Xbox 360 platforms will support 1080p resolution at 60 frames per second. All platforms will support both Stereoscopic 3D and Virtual Reality with the use of a compatible VR headset. In addition, there will be multiple high-quality, uncompressed stereoscopic textures to be used in the course of gameplay. The game engine has been built with developer support
