#### **What's New In MS Word Print Multiple Documents Software?**

I'm using a Word 2007 version to print multiple documents. The printing was configured in the printer settings. As soon as I try to print the documents, the print dialog appears with the printer already selected. However, nothing happens when I click on print. Does anybody know what's going on? This is very new feature of the "Microsoft Office 2010". MS Word Print Multiple Documents Software enables the user to print multiple documents from Microsoft Office programs. This unique feature is just like the ability to print from a printer and many other e-mail programs to print multiple documents at the same time. Features: 1. Drag & Drop of Multiple Word Documents 2. No Setup or Configuration Required 3. Auto save option
