Features Key:

Introducing a classic tower defense game with a unique combat system. Players can adopt three different combat tactics: shoot, grab, or blow up.

The tower defenses are not surrounded by any bounds. Players can choose whatever number of towers they wish to control.

Multiple combat targets to take into account. Attack more than one target, and the tower will automatically adjust its positioning to fire at different targets.

The detailed combat system. Each tower can be placed at different angles to decide its combat actions.

You are free to choose the shooting range of a tower. Players can choose different settings for all of their towers.

Various maps have been provided to suit your strategic preferences.

The Tower Of TigerQiuQiu Ladder Key Features:

- **You are free to choose the shooting range of a tower. Players can choose different settings for all of their towers.** Players can choose which type of ceiling and other settings of their towers to fine-tune the efficiency and accuracy to play as they wish. Players can select a suitable shooting range according to the environment. Also, players can adjust the tower's shooting direction and position to get higher targeting accuracy.
- **Pilot multiple weapons. Trigger the special ability to engage the target's entire ability. Customize the order of attack to deal a killing blow to an enemy.**
- **Combine various towers against different enemies. To take your place in the attack line, simply adjust the tower's position as long as more than one target is clearly visible.**
- **The detailed combat system. Each tower can be placed at different angles to decide its combat actions.** Which will better ensure your tower's accuracy, covering range, etc.
- **Effects to enhance your tower. For instance, Ultimate - Blast - For your damage and shockwave attacks.**
- **Based on the scenario while the map is chosen, the real time is set to fire.**
